

Introduce yourself ?

- Hello [All/Next person Name], Good morning/afternoon/evening
- My name is **Kiran Atmaram Aher**.
I have completed my **Bachelor of Computer Science** from **ACS College, Kalwan**, under **Savitribai Phule Pune University**. I passed out in **2021** from **Nashik, Maharashtra**.
- I started my career in **Web UI development** as a **Frontend Developer Intern** at **Manasvi Tech Solution Pvt. Ltd., Nashik**, where I worked on responsive UI development and improved my skills in HTML, CSS, and JavaScript.
- Currently, I am working at **Decimal Point Analytics, Nashik** as an **Executive Frontend Developer (UI – React)**.
I am working on technologies such as **React JS, Angular, Next.js, HTML5, CSS3, JavaScript (ES6), Bootstrap, Material UI**, and I follow **Agile methodology**.
- I have around **2.6+ years of hands-on experience** in frontend development.
Right now, I am working in the **data analytics / enterprise web application domain**, where my current project involves building **responsive, high-performance UI components**, converting **UI/UX designs into pixel-perfect interfaces**, optimizing performance, and collaborating with designers and backend teams.
- Overall, I am passionate about creating **clean, scalable, and user-friendly interfaces**, and I am continuously working on improving my skills in modern frontend and full-stack technologies.

What are your roles and responsibilities?

- I am handling all **responsive and reusable UI components** related activities
- Currently I am working on Angular, HTML, CSS, React.js, Next.js and also Angular
- Creating a web pages as per VD or Wireframe,
- Converting **UI/UX designs (Figma/Adobe XD)** into **pixel-perfect, user-friendly interfaces**.
- Working with **UI libraries** such as **Material UI and Bootstrap** to maintain design consistency
- Checking Clickup/mail on daily basis in case any bug lock against me
- Using **Git, GitHub, and Bitbucket** for version control and managing pull requests.
- Connecting with backend team for discussing API logic and implementation
- Attending daily standup call for the updates
- I will be the part of product grooming session for requirement gathering

Why are you looking for a job change?

- My current company is small scale but a very nice organization. Here I learned a lots of things
- Now at this stage I am looking a change for my better career growth
- And off course, for the financial stability

What is your CTC?

- I do not have any figure in my mind. I am ok as per company policy or standard
- Do one thing schedule my technical interview and based on technical skills you can offer me, if everything goes positive for you
- [OR] I am expecting around a 50%-60% hike on my current CTC.
- [OR] Tell the exact figure as per your expectation

Why should we hire you?

- I am looking for job change, also my skill sets are exactly matches with your JD requirements
- So I think, if you feel that I am technically sound and I can work for your projects, you Should hire me

Do you have any offers?

Yes I have it in pipeline

What is your strength?

- Well I am good team player
- I am a quick learner
- I can absorb pressure with positive intent

What is your weakness?

- I can't say no when somebody ask me for the help
- I can't lie with confidence
- I can't work with an empty stomach

Follow up session

Asking for an interview schedule?

- Hi [Good morning/Good Afternoon/Good Evening], **Name of HR**
- When are you planning to schedule my interview?
- Can I expect an interview today?

Interview is done and you are asking for interview feedback?

- Hi [Good morning/Good Afternoon/Good Evening], **Name of HR**
- Actually yesterday I was done with my [L1/L2] technical round.
- I think I had given my best and the discussion was very positive
- Did you receive my feedback from the technical panel?
- **[If HR say not received yet]** Please update me once you received it, I am waiting for it
- **[If HR say Negative feedback]** Actually, I wonder because the discussion was so effective and I was able to answer almost all of the questions along with technical scenarios. I was also able to solve programming snippets. Please provide the proper justification regarding my rejection so that I can improve myself on that front.
- **[If HR say Positive feedback]** thank you for the feedback. What will be the next process?

Assignment completed but not get any feedback?

- Actually yesterday I submit my task and also create repo on github
- So did you get any feedback from technical panel regarding my assignment?

Not able to complete a task?

- See currently we have to work on urgent deliverables
- So we might need to stretch working hours in this week
- So sorry for inconvenience but I will not be able to complete your task on these weekdays
- I can do it on weekends

Call to HR and approach for an interview

- Hi, This is "**first name Last name**"
- **[You got call and you missed]** Actually, I got a call from the same number but I missed it because I was in the middle of something. Yes please tell me now we can talk
- **[You got reference from TechPraful]** I got your reference from my friend [Take friend name from admin]
- Basically, I am looking for a job change
- Is there any job openings?
- Mentioned technical stack

In case Power outage

- Actually power outage in my area on every **Thursday**
- So battery about to die
- If laptop dry
- I will rejoin from mobile
